## PROFESSIONAL SUMMARY

Senior WordPress Engineer and Full Stack PHP Developer based in Chennai, India, with 6+ years of experience delivering scalable business websites, e-commerce platforms, cloud-hosted applications, and custom CRM systems. Specialized in Elementor, custom plugin development, AWS cloud infrastructure, Linux server administration, technical SEO, and performance-focused web development. Proven track record of building responsive digital platforms with a strong focus on scalability, security, user experience, and search visibility.

## CAREER HIGHLIGHTS

- 6+ years of professional experience in WordPress, WooCommerce, and Full Stack PHP development.
- Successfully delivered 15+ production websites including e-commerce, CRM, SEO, and business platforms.
- Hands-on experience with AWS infrastructure, Linux server administration, and cloud deployment.
- Strong expertise in Elementor, technical SEO, and website performance optimization.
- Improved website performance scores from 60 to 90+ using caching, image optimization, and Core Web Vitals enhancements.
- Reduced average website load time by 40% through CDN integration, caching strategies, and image compression.

## PROFESSIONAL EXPERIENCE

### Senior Web Solutions Engineer | **Hitam Newgen Evolutions Pvt Ltd**

Jul 2024 – May 2025 | Chennai, Tamil Nadu, India

- Led end-to-end development and deployment of WordPress and WooCommerce websites for multiple clients.
- Developed 5+ custom CRM dashboards using CodeIgniter and MySQL, streamlining lead management workflows and reducing manual reporting time for client teams.
- Managed AWS infrastructure — including EC2, RDS, and SES — across production environments.
- Implemented technical SEO improvements and Core Web Vitals optimizations that enhanced page load speed by 30% and improved search engine rankings across client websites.

- Configured Linux servers, SSL certificates, domain migrations, and hosting environments.

## **WordPress Developer | [VentureWicks Resources](#)**

*May 2022 – Sep 2024 | Chennai, Tamil Nadu, India*

- Developed and deployed 15+ WordPress and WooCommerce websites with optimized SEO, performance, and responsive UI.
- Built custom WordPress plugins including booking systems and third-party API integrations.
- Integrated Razorpay, Stripe, and PayPal payment gateways across 10+ e-commerce platforms, improving checkout reliability and enabling seamless transaction processing.
- Reduced average website load time by 40% through caching optimization, CDN integration, database tuning, and image compression.
- Ensured full mobile responsiveness and cross-browser compatibility across all delivered projects.

## **Application Developer | [ThinkBiG Software Solutions](#)**

*Aug 2021 – Apr 2022 | Chennai, Tamil Nadu, India*

- Developed user authentication and secure transaction processing features for a FinTech application using PHP and PGP encryption, reducing security vulnerabilities by hardening data protection protocols.
- Enhanced application security and software stability by optimizing backend PHP code and enforcing code review practices, reducing production incidents.
- Built backend modules using PHP and MySQL to support high-traffic application workflows, improving system performance and maintainability.

## **Associate Software Engineer | [Cratio CRM](#)**

*Jun 2019 – Jun 2021 | Chennai, Tamil Nadu, India*

- Developed 5+ CRM modules and integrated email marketing features for a client base of 1,000+ users using the Symfony framework.
- Managed 5+ AWS EC2 servers and Linux hosting environments, ensuring optimal uptime, performance, and security across production systems.
- Developed responsive frontend interfaces for 5+ web applications using HTML, CSS, JavaScript, and jQuery, improving usability and cross-browser compatibility.
- Diagnosed and resolved production issues across the CRM platform, improving overall reliability and reducing downtime for end users.

## **FEATURED PROJECTS**

---

### **CommerceSend — Email Marketing Platform**

Developed a scalable email marketing platform using PHP and Symfony. Built campaign management modules, an analytics dashboard, and automated email workflows, improving marketing efficiency and contributing directly to revenue growth.

**Tech Stack:** PHP, Symfony, HTML5, CSS3, JavaScript, jQuery

### **Cratio CRM — Lead Conversion & Productivity Tool** <https://cratiocrm.com/>

Contributed to CRM modules focused on lead conversion, productivity management, and marketing workflows. Delivered UI improvements and optimized lead processing from Facebook Ads and Google Ads integrations.

**Tech Stack:** PHP, Symfony, CRM Development, JavaScript, jQuery

### **AWS Infrastructure Management & Server Administration**

Managed AWS cloud infrastructure including EC2, RDS, SES, SSL certificates, DNS routing, and server monitoring. Developed automated PHP scripts for server usage alerts and email notifications to improve uptime and reliability.

**Tech Stack:** AWS EC2, AWS RDS, AWS SES, Linux, PHP, Server Administration

### **Secure FinTech Platform with PGP Encryption**

Led backend development of a secure FinTech platform for encrypted client file management using PGP encryption. Improved platform security, data protection, and user experience for enterprise-level financial workflows.

**Tech Stack:** *PHP, PGP Encryption, MySQL, Security Engineering*

### **Custom Admin Dashboard System**

Built a custom admin dashboard integrating WordPress with CodeIgniter-powered modules. Delivered responsive frontend interfaces, analytics dashboards, and workflow management tools for efficient business operations.

**Tech Stack:** *WordPress, CodeIgniter, PHP, MySQL, HTML5, CSS3, JavaScript*

### **HitamConnect — Astrology Consultation Web Application**

Developed a full-featured astrology consultation web app using CodeIgniter 3 and MySQL. Features include a wallet recharge system, astrologer availability management, live consultation timers, Zego UIKit audio/video sessions, and a secure admin panel.

**Tech Stack:** *CodeIgniter 3, MySQL, Zego UIKit, SweetAlert*

### **Simple Tech Groups — Technology & Digital Solutions Platform** <https://simpletechgroups.com/>

Developed and managed the corporate platform for Simple Tech Groups, covering web development, digital solutions, hosting, SEO, and business automation. Implemented responsive UI design, performance optimization, and SEO-friendly architecture.

**Tech Stack:** *WordPress, Elementor, PHP, SEO, Hosting Management, Performance Optimization*

## **EDUCATION**

---

### **Diploma in Computer Engineering**

Ramakrishna Mission Polytechnic College, Chennai, Tamil Nadu

*Jun 2016 – Apr 2019*
